Corporate Travel Software. Payment Enhancement

euristiq + FLEETCOR

Web development | Micro-Services | SaaS deployment | Integration services | QA/QC testing | Legacy modernization

Enhanced a corporate travel management platform to streamline employee travel and expense management. Implemented a microservices approach and introduced third-party integrations for seamless booking, payments, and real-time financial tracking.

Integrated third-party services for VAT refunds and virtual credit card issuance, enabling businesses to improve financial control and reduce payment friction. Upgraded outdated components, ensuring better security and payment processing capabilities.

TECHNOLOGY STACK

ASP.NET Core | Android/iOS | RabbitMQ/MSMQ | MS SQL | CQRS, MediatR | Kubernetes

AWS SERVICES

Dynamo DB | Amazon SNS | Amazon SQS | Aurora DB

OUTCOMES

- Microservices adoption for enhanced scalability and performance
- Third-party integrations improving financial control and user experience
- Payment system enhancement resulting in 34% increase in successful credit card payments
- 2x increase in unique users and 3x growth in hotel searches
