Commercial Real Estate Finance Platform

euristiq + FUNDRE

Discovery | UX/UI design | Web development | Architecture | QA testing | Integration services

The real estate finance platform built in less than a year provides full automation when it comes to matching sponsors with lenders according to their lending criteria.

In addition the platform offers an easy way to make deals, search deals, make transactions, analyse data.

TECHNOLOGY STACK

Node.js | NestJS | PostgreSQL | DDD | CQRS | HTML/CSS/JavaScript | Angular | NgRx | Bulma | Jest | Google Maps | AWS

OUTCOMES

- Cloud-based architecture on AWS for enhanced scalability and performance
- Real-time property data processing improving search accuracy and speed
- Advanced geolocation features for precise property visualization
- New UX/UI design leading to higher user engagement and conversion rates
- Third-party integrations with financial institutions and property databases
- Automated CI/CD pipeline ensuring faster and more reliable deployments
