Bike Rental Software. Custom Dashboards. Payment Integration

euristiq + GOBike

Web development | Mobile app development | UX/UI design | IoT | Architecture | Integration with payment systems | QA testing | SASS

A Danish e-bike provider partnered with Euristiq to develop a unique, scalable bike rental system. We built desktop and mobile apps with real-time fleet tracking, GPS-enabled onboard tablets for route planning, and secure Altapay payments. The full solution was delivered in just 3 months.

TECHNOLOGY STACK

ASP.NET | MVC | SQL | Memcached | Android | HTML/CSS/JavaScript | StructureMap | Google Maps | jQuery | Bootstrap | Altapay

OUTCOMES

- Scalable bike rental system with 200 000+ users and 1.5 million trips
- Real-time bike tracking for availability and location updates
- GPS-enabled onboard tablets for route planning and monitoring
- Secure payment integration with Altapay
- Flexible pricing system for dynamic subscriptions and rates
