Training and Performance Tacking Portal

euristiq + HEART ZONES

Discovery | Web development | IoT | Cloud adoption | Architecture engineering | UI/UX design | SaaS deployment | QA/QC testing

Starting with Discovery service we developed a portal that aggregates data from wearable devices and transforms it into performance insights using the company's methodology. The portal tracks records and displays progress through dynamic dashboards.

TECHNOLOGY STACK

Java | Hibernate | Spring Framework | DDD | CQRS | Google Chrome Web | Angular | Bluetooth API

AWS SERVICES

Dynamo DB | CloudFormation | Amazon WAF | Amazon CloudFront | Amazon Lambda | Amazon CloudTrail | Amazon RDS

OUTCOMES

- Integration with third-party fitness hardware for automated data collection and reporting
- Role-based access control implementation ensuring secure user management
- AWS-based architecture for high availability and scalable performance
- Optimized reporting and analytics for data-driven decision-making
- 2,040 schools and 1,000,000 students have already benefited from a new approach to fitness
