Legacy Modernization.
Cloud Migration. New Design

euristiq + RYANAIR

UX/UI design | Web development | Micro-Services | DevOps | QA/QC testing | Architecture | Cloud migration | Integration services

Worked on the seamless legacy modernization of a website for the largest airline company, serving 3 million daily users. Implemented a new user-friendly interface and resilient micro-frontend architecture.

Integrated third-party services for ticket purchasing, accommodation booking, and car rentals, enabling cross-selling and up-selling opportunities for the client.

TECHNOLOGY STACK

AWS | Angular | HTML | NgRx | CSS | Typescript | JavaScript | RxJs | SASS

OUTCOMES

- Micro front-end architecture implementation for better maintainability and availability
- Cloud migration from Adobe to AWS resulting in 3X performance improved
- New UX/UI resulting in higher conversion rate
- DevOps services based on AWS
- Third-party systems integration
