Vendor Management System Modernization

Beeline's vendor management system helps enterprises and mid-market companies track staffing suppliers, consultants, and contingent labor. Euristiq has spent three years building the time-and-expense tracking core of the platform, cutting manual errors and giving customers real-time control over contractor spend.

Legacy modernization | Workforce management software | Custom software development | Time & expense tracking | AWS | Integration services

Outcomes

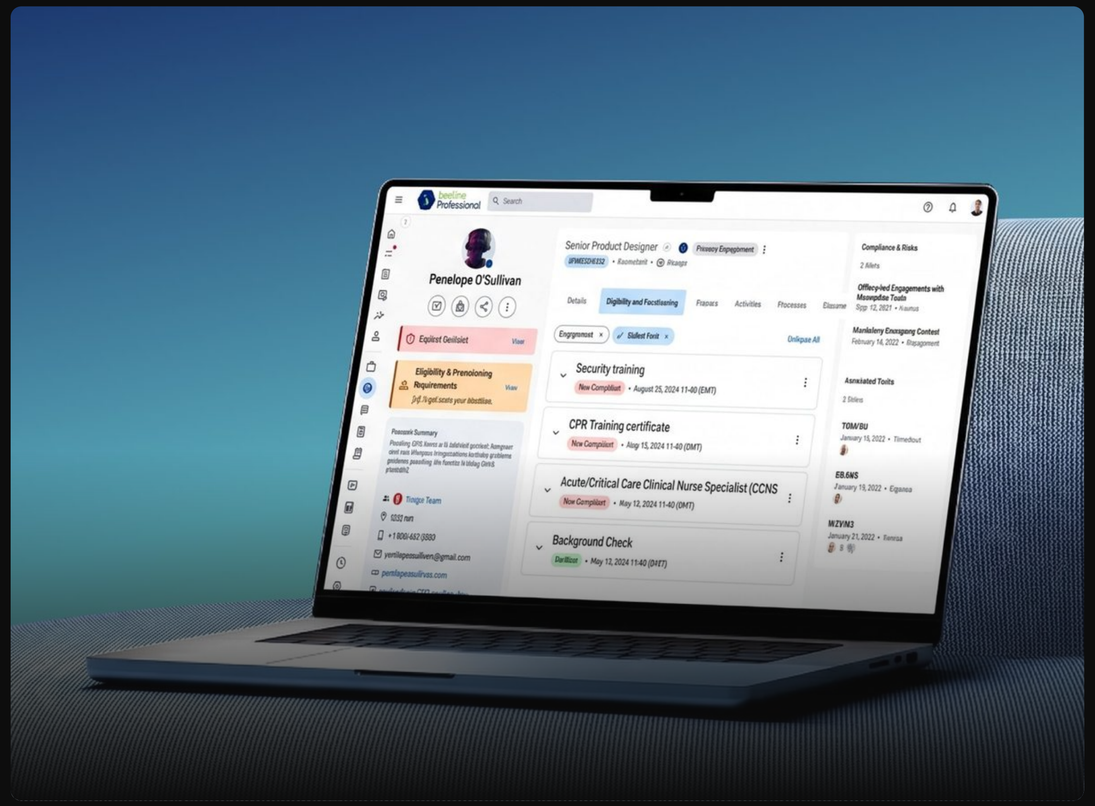

97% fewer manual errors
Automated timesheet rules and approval workflows replaced spreadsheet-driven tracking.

400+ brands rely on the VMS
Beeline's platform is used by more than 400 enterprise and mid-market brands.

158% ROI in 3 years
Measured return on investment across the engagement.

Faster program rollout
Pre-built templates and configurations shorten setup for new workforce programs.
