Safer Driving with Road Traffic Monitoring

Our client, a company that delivers top-tier custom solutions for a variety of use cases in smart cities and traffic management, was seeking a company providing IoT development services for a proof-of-concept for real-time road traffic monitoring software.

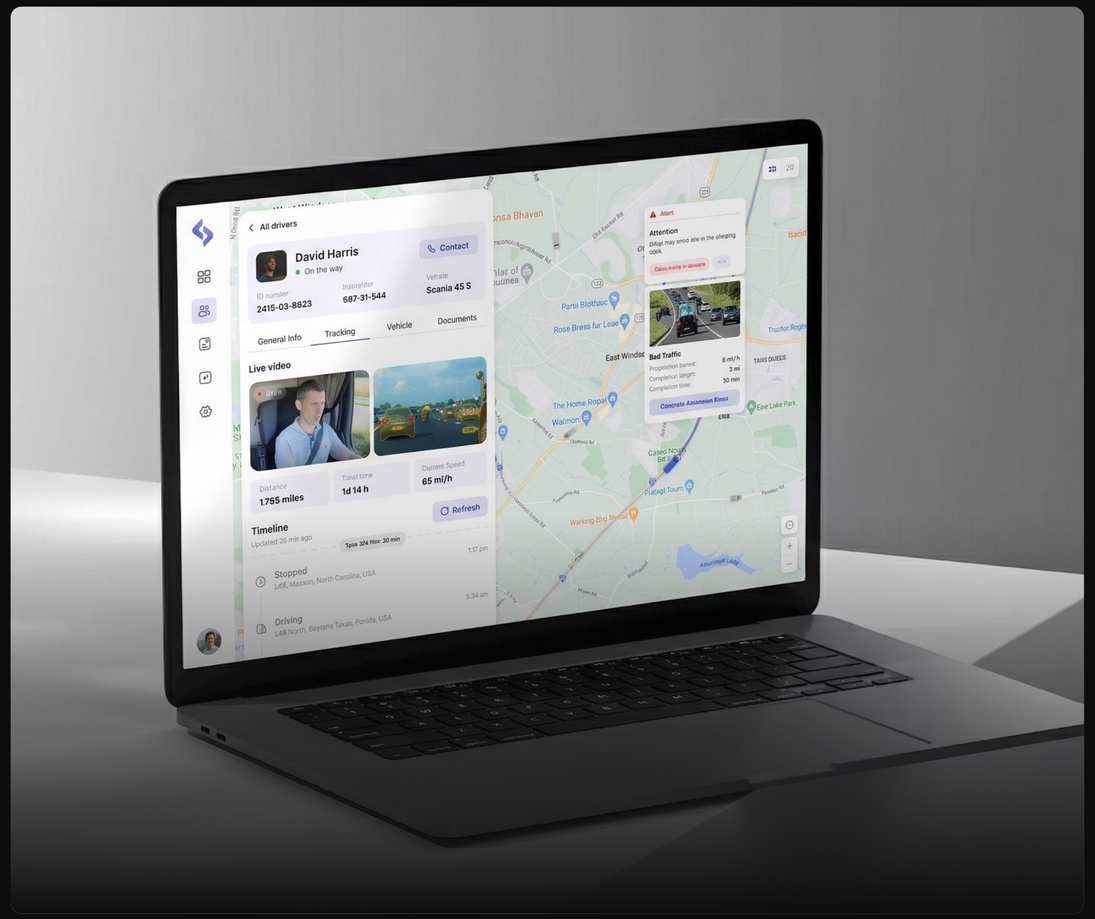

Discovery | PoC | IoT | UX/UI design | AWS | Custom software development

Outcomes

PoC deployed in Dublin Port Tunnel
The Euristiq team successfully provided a PoC of video management solution for road traffic monitoring and automatic incident detection, deployed within the Dublin Port Tunnel to safeguard key infrastructure and ensure citizen safety.

Traffic monitoring system
Aggregates data obtained from cameras, analyzes it into reports and alerts.

Automatic incident detection
The system is implemented in the Dublin Port Tunnel.
