Video Analytics for Banks and Retail

The client, a provider of smart building and video analytics solutions, partnered with Euristiq to develop video analytics software for banks and retail. The IoT platform processes large volumes of unstructured video data from cameras and sensors in real time, displaying insights through customizable charts in a web app.

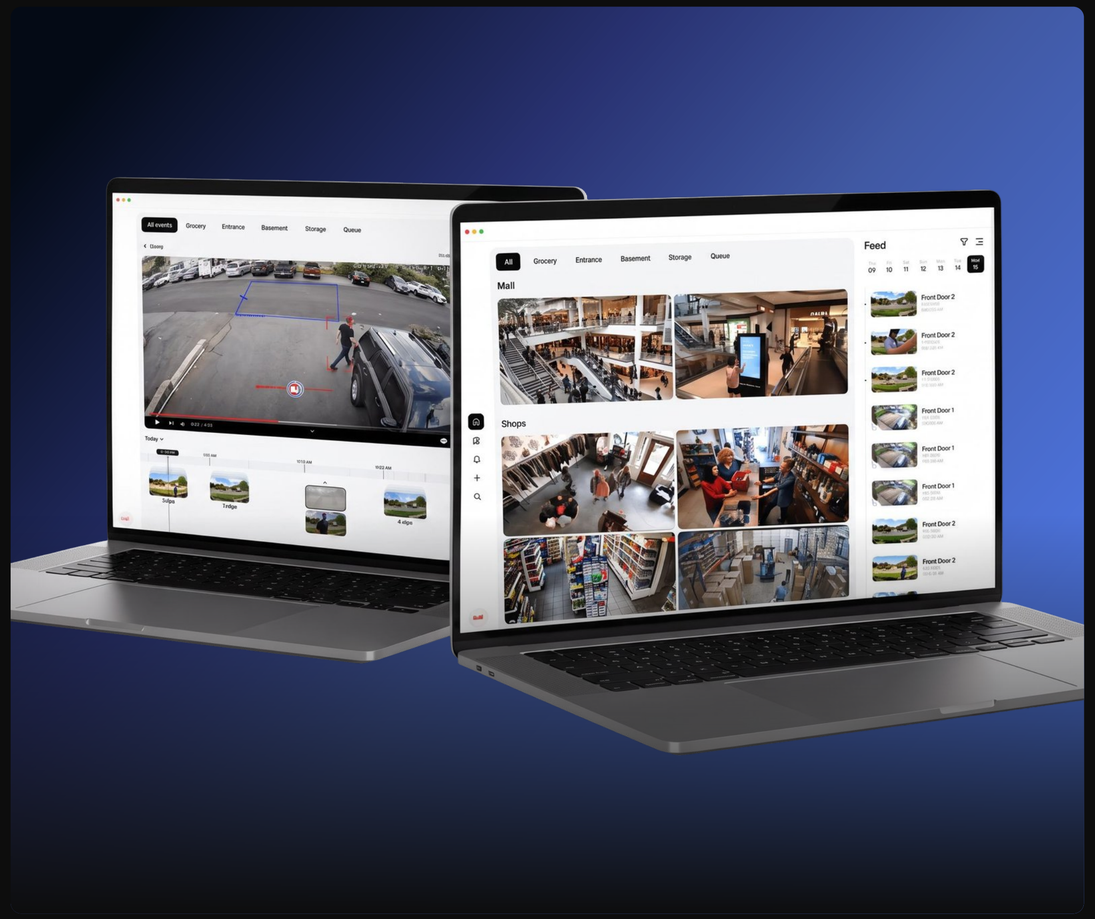

Discovery | IoT | Custom software development | Real-time asset tracking | Data collection & processing

Outcomes

IoT solution for video data structuring and analysis
Intelligent video analytics system translates raw video data into actionable insights for improved customer experience.

Data visualization with customizable reports
App generates custom reports on customer demographics, wait times, and queue lengths, tailored to industry-specific needs.

User-friendly, scalable, integration-ready web application
Supports third-party applications, providing banks and retailers with a comprehensive tool for studying customer behaviour.
