Corporate Travel Platform Modernization

Corpay's corporate travel booking software let small and midsize companies book hotels and manage workforce travel expenses, but an outdated monolithic codebase broke the payment flow and couldn't keep up with growth. Euristiq rebuilt the payments core on microservices and modernized the infrastructure on AWS.

Legacy modernization | Custom software development | Workforce travel management | AWS | Integration services

Outcomes

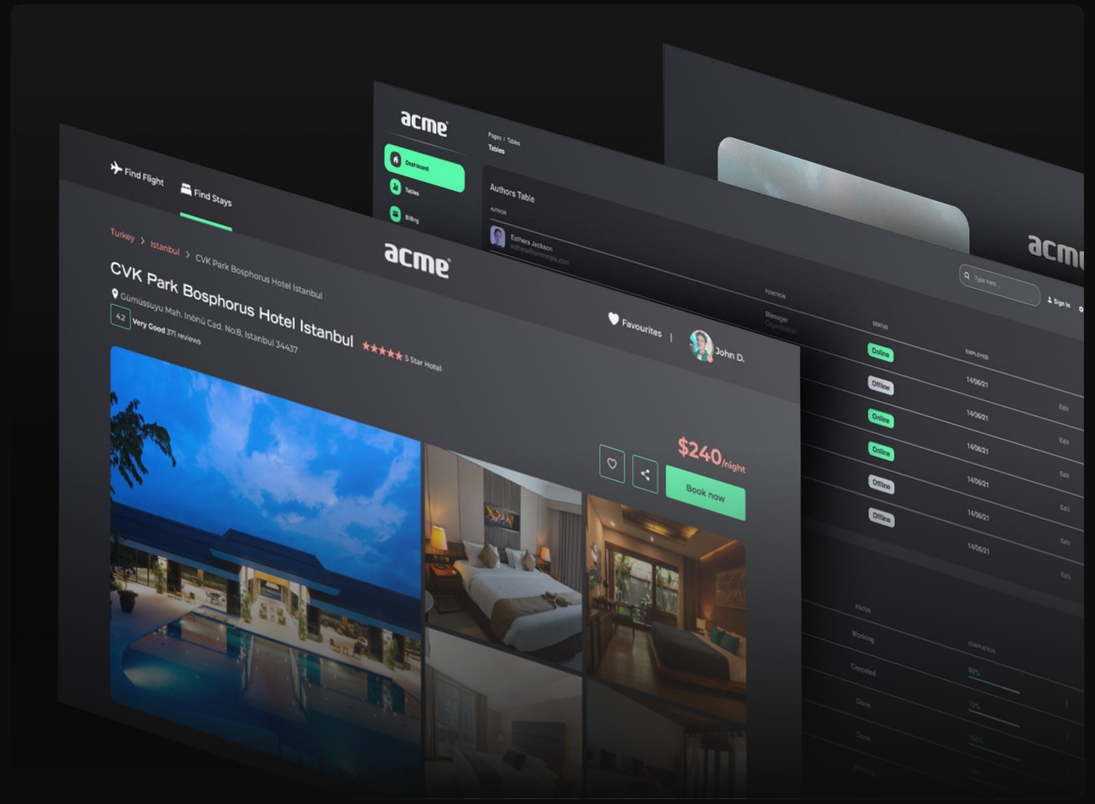

2× unique users and searches
Weekly users and hotel searches roughly doubled, June 2021 to April 2023.

34% more successful payments
Moving card payments to a 3D Secure v2 flow, with v1 fallback, cut failures.

13-pt faster search speed
Searches returning in under 6 seconds rose from 77% to 90%.

99.69% peak weekly uptime
Up from a low of 97.49%, over two years of collaboration.
