Family Office Wealth Management Portal

Euristiq partnered with Mozaiik Wealth Tech to give Canadian investment counsel firms and multi-family offices a consolidated, audit-ready view of their multi-entity clients. The platform replaces spreadsheets with a purpose-built system of record, built AI-native on AWS.

Discovery | MVP | Custom software development | Entity-first data model | AI-native development | AI | AWS | Cloud infrastructure & development

Outcomes

First Canadian-native platform
Built around Canadian regulatory requirements for investment counsel and family offices.

$150K+ annual savings
Estimated savings for firms switching from US-built platforms.

40%+ development cost savings
Delivered under the original budget through AI-native development.

SOC 2-aligned from day one
Security controls, data isolation, and audit trails built in from the start.
