Investment Portfolio Management Software Modernization

Octopus Group’s legacy application for managing investor portfolios, bank accounts, and withdrawals couldn’t keep up with a fast-growing impact investing business. Euristiq joined an in-progress modernization and rebuilt the software end to end.

Legacy modernization | Azure | Cloud infrastructure & development | Integration services

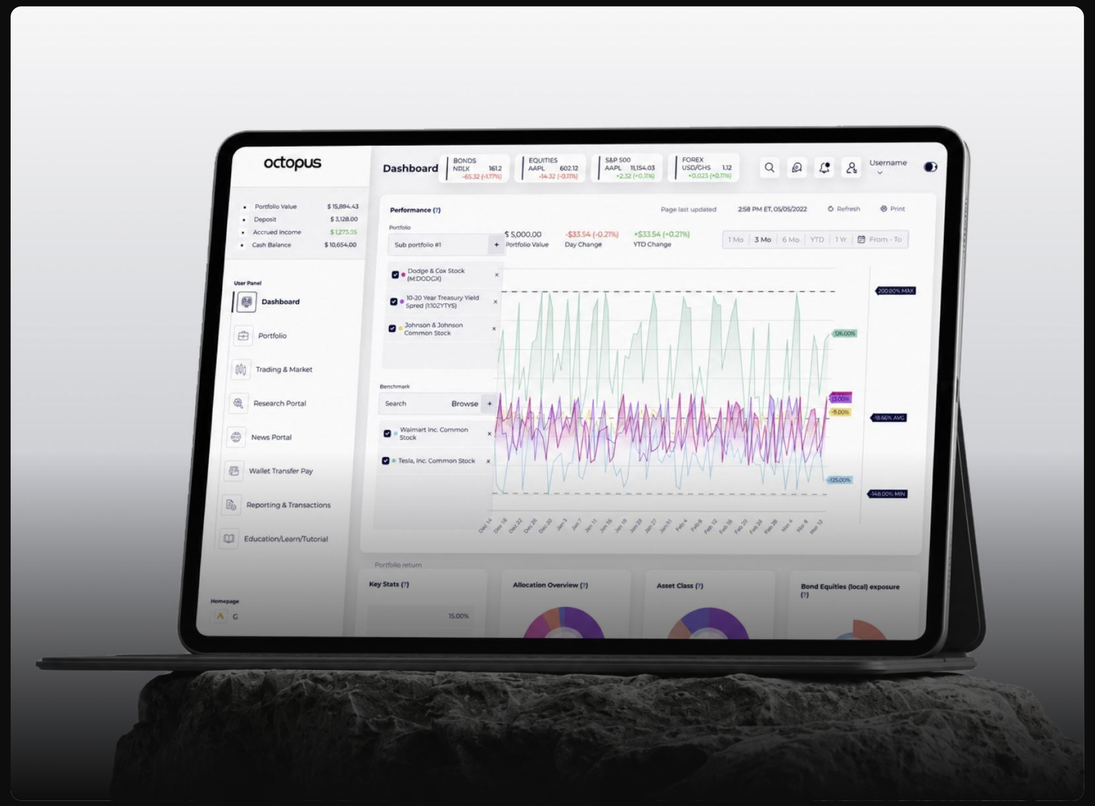

Outcomes

£12.9B in assets managed
The platform runs fund operations for over 63,000 investor profiles across renewable energy, healthcare, and property.

750+ internal users
Octopus Group employees run daily investor and portfolio operations on the platform.

Reliable third-party sync
The GatewayAPI keeps investor, portfolio, and transaction data synchronized, cutting manual reconciliation.
