Energy Intelligence Software Rebuilt

Euristiq rebuilt MarketIQ — Rodan's real-time energy trading platform that processes large volumes of energy-related data to help market participants maximize profits, reduce risk, and make data-driven decisions — so handling that data was critical.

Legacy modernization | UX/UI design | Cloud migration | Custom software development | Data collection & processing | Azure | Integration services

Outcomes

Full electricity market visibility
One subscriber-based platform now covers zonal pricing, demand forecasts and actuals, scheduled imports and exports, and intertie flows and limits

76% faster page loads
Average page load time dropped from 13.31 seconds to 3.14 seconds after the caching and API restructuring work

3,233× larger cache
Cache capacity grew from 300 to 1,000,000 entries, supporting 30,000 unique data points arriving daily from Ontario's IESO

Domain	Location	Platform's capability
Energy	Canada	30K data points processed daily
