Legacy Web App Modernization

Euristiq helped Europe’s largest airline with the legacy modernization of a new, user-centered version of the Ryanair web app — a digital platform for buying tickets, booking accommodation and renting cars. The platform now serves 3 million users daily.

Legacy modernization | Cloud migration | Mobile | AWS | DevOps | UX/UI design | Micro-services | Integration services

Outcomes

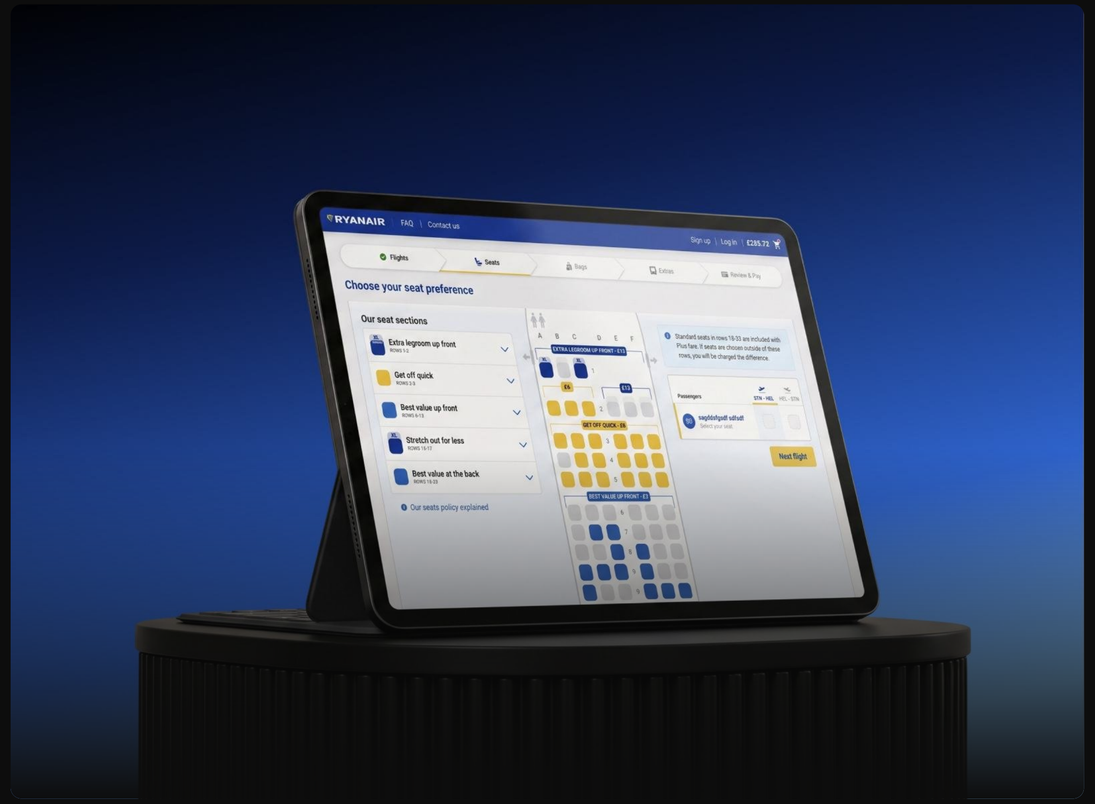

3× faster platform
Time to user interaction improved threefold versus the previous iteration

AWS + micro front end
Migration to AWS Cloud with a new UX/UI and micro front end architecture

Independent deploys
Sections ship separately, improving availability and reducing release risk

Weeks, not months
New third party tools integrate in weeks thanks to the new architecture

RYANAIR

Domain	Location	App’s capability
Aviation | Travel	Europe	3 million visitors served/day
