Asset Management Software Modernization. E-Sentry

euristiq + IRISS

UX/UI design | Web development | DevOps | Accessibility review | Architecture | Mobile development | Legacy modernization

We helped IRISS to modernize their E-Sentry Asset Management Solution, a cloud-based platform designed to optimize operational efficiency for maintenance and reliability teams.

Focus areas: readiness for market launch; ISO 27001 certification alignment; scalability for future growth; security and data protection validation; UX and accessibility improvements.

TECHNOLOGY STACK

.NET | Angular

AWS SERVICES

RDS | CloudFront | IoT | CloudFormation | Redis | InfluxDB

OUTCOMES

- Security and data protection audit aligned with ISO 27001 certification standards
- UX/UI redesign and accessibility assessment for enhanced user experience across web and mobile
- AWS infrastructure optimization for performance, scalability, and cost-efficiency
- Cross-platform system integration (Web, Mobile, Backend, Hardware) for seamless user interaction
