Physician Scheduling Software Modernization in Healthcare

euristiq + METRICAID+

Software audit | Decision on the technical stack | Architecture consulting | Technical consulting | Requirements elaboration

In 8 weeks, we completed an independent audit of the outdated software, and designed a full modernization plan ready for immediate kickoff.

The client received a clear architecture, implementation roadmap, and the team to help confidently execute the transformation.

TECHNOLOGY STACK

AWS | Golang (Go) | Node.js | React + TypeScript | TanStack Query | React Native + Expo

OUTCOMES

- Modernization was delivered without downtime, so operations continued without revenue loss
- Reduced maintenance overhead lowered the total cost of running and supporting the platform
- Faster release cycles enabled quicker rollout of new features and improvements
- The platform is now ready to scale with business growth without costly rebuilds
- Improved stability reduced operational risks, minimizing errors and service disruptions
